

SKIRKANICH HALL | QUAIN COURTYARD | SEATING OPTIONS

1. To find the best location, I first placed multiple points across the site where there was sun, shade, and/or seating.
2. The best location is sunken below the other sites and receives sunlight and shade. The worst location is exposed to the sun throughout most of the day.
3. Site 03 is best because has some shade due to the heights of the walls around it but still gets light throughout the day.
4. The limitations are that the wind and heat radiation from nearby buildings are not taken into account, which could result in a different comfort level.
